Webpage of the course	https://geography.lnu.edu.ua/course/
Information about the course	"Norms of Academic Communication" is a mandatory course in the general preparation cycle of specialty 106 Geography, at the second (Master's) level of higher education, taught in the first semester with a workload of 3 credits (ECTS).
Course abstract	The course aims at forming skills of written and oral communication within scholarly/academic community as well in business activities. Students will learn how to efficiently use e-mail services and videoconferencing. The main attention, however, will be paid to the standards of academic writing, which cover style and structure of scientific papers, appropriate citing, and styling of figures and tables. Students will also learn tips of oral and multimedia scholarly presentations as well as discussions. Business component of the course will cover such topics as preparation of a CV and a motivation letter, as well as some skills of face-to-face interview/negotiations. The course is project-based – the students will use their individual Master study material and personal examples for practice.
The aim and tasks	The aim is to teach Master (MS) students in the fundamental principles, styles, and rules of international academic and business communication, encompassing both spoken and predominantly written forms. Tasks are: <ol style="list-style-type: none"> 1. To provide an understanding of conceptual approaches to communication. 2. To teach: (i) writing in both academic and business styles; (ii) logical structuring of scientific and business documents; (iii) various methods of referencing sources within the text, as well as different styles of formatting bibliographies using specialized software; (iv) the culture of scientific multimedia presentation and discussion; and (v) the formatting of business personal documents - CVs, motivational letters, etc. 3. To provide skills for direct business communication.

	<p>Self-study (4 hours): Each student should prepare a motivation letter. Additional reading [21, 23].</p> <p>Week XVI</p> <p>Seminar 8 (2 hours): Individual presentations of motivation letters and a group discussion on its content, structure and style. Face-to-face interview / negotiations</p> <p>Self-study (2 hours): Each student should prepare own final motivation letter after a group discussion during Seminar 8. Additional reading [1, 3, 5, 9, 24, 25].</p>
Final evaluation	The evaluation is based on the continuous or ongoing performance of students throughout the semester rather than a final examination.
Prerequisites	Students should have an intermediate or higher level of proficiency in both spoken and written English.
The teaching methods and techniques that will be used during the course will include:	This course is project-based, where each MS student will acquire communication skills through the use of material from their own qualification research during seminars. Lectures are presented in the form of multimedia presentations at the beginning of thematic blocks. In the seminars that follow the lectures, there is a demonstration and discussion of individual cases of the MS students.
Required equipment	Students should have relatively modern computers and internet connections, including access to the university's corporate cloud services such as MS Office 365.
Assessment criteria	<p>Assessment is conducted on a 100-point scale. Points are awarded for participation and comments during seminars, as well as for engagement during lectures. However, the primary focus is on the written component of assignments, which is directly related to the MS student's qualification work and their individual preferences regarding future employment within the field.</p> <ul style="list-style-type: none"> • Written assignments: 60% of the semester grade; maximum score: 60. • Oral presentations, comments, responses: 40% of the semester grade; maximum score: 40. • The total maximum score is 100. <p><i>Written assignments:</i> It is expected that students will prepare a short text related to their individual qualification work for each seminar.</p> <p><i>Multimedia presentations:</i> Each course participant will prepare at least one multimedia presentation and present it during a seminar.</p> <p><i>Academic Integrity:</i> This course aims to instill a clear understanding of the norms of academic, scientific, and professional behavior in MS students. The absence of citations for used sources, fabricating sources, plagiarism, and interference with the work of other students constitute, but are not limited to, examples of possible academic misconduct. The detection of signs of academic misconduct in a written assignment or multimedia presentation by a student may lead to referral to the disciplinary committee as the beginning of the procedure for their expulsion from the university.</p> <p><i>Attendance:</i> It is expected that all students will attend all course seminars. Students are required to adhere to the deadlines set for the submission of written assignments.</p> <p><i>Literature:</i> Educational materials, including software and literature, will be provided to students exclusively for educational purposes without the right to</p>

	<p>transfer them to third parties. In addition to the materials provided, students are encouraged to use other materials and sources.</p> <p><i>Grading Policy:</i> In addition to the points earned for completing written assignments and for participation in seminars, points are awarded for attendance at seminars, as well as for short responses and comments during sessions. Grades are lowered for late submission of written assignments</p>
<p>Questions for control during the seminars</p>	<ol style="list-style-type: none"> 1. Types of scholarly, scientific and business communication. 2. Write following emails: (i) to initiate a meeting with a colleague, (ii) to invite colleagues to the meeting which you organize, (iii) to meeting organizers who invited you to participate at the meeting. 3. Explain and show how to use different software to communicate and organize meetings with scholars in Ukraine and abroad. 4. Using the outline of the research publication which you developed during the course, explain its structure and a content of each part. 5. Principles, style and format of using social media in scholarly communication. 6. Imagine: you are the lead author of the scientific paper. How will you organize your work with co-authors? 7. How to write a project application: main steps, structure, and content. 8. Using the presentation which you prepared during the course, please, explain main principles and the structure of a scholarly presentation. 9. How to organise and keep a scholarly discussion: main rules and principles. Provide an example of such discussion in which you participated during the course and analyse it. 10. What is business communication? Main principles and forms. 11. Using your CV which you wrote during the course, explain how CV should be organize – structure, content and style. 12. Using the motivation letter which you prepared during the course, explain what such letters should include, what style should be used and what are the coming mistakes in writing such letters. 13. A job interview: a lecturer and student will improvise a job interview.
<p>A course quality evaluation questionnaire</p>	<p>At the end of the course, an anonymous course quality evaluation questionnaire will be provided</p>
